

April 6th & 7th, 2024

www.GalvestonSteampunk.com

The Galveston Steampunk Festival has something to offer for all ages including authors, entertainment, live demonstrations, games, vendors, presenters, train rides, and much more!

Join us at the Galveston Railroad Museum as we step back in time through machines, performances, music, costumes, lectures, and immerse yourself in the world of Steampunk.

Steampunk is a subgenre of science fiction that incorporates retro futuristic technology and aesthetics inspired by 19th-century industrial steam-powered machinery. The extensive history of mechanical innovation displayed at the Galveston Railroad Museum embodies the steampunk spirit. Galveston was built by Victorian industrialists, who used new machines and new fabrication methods to drive economic development.

Galveston is the perfect backdrop to explore the industrial history that informs our steampunk curiosity today.

Galveston Steampunk Festival Activities
